Just Stronger
Trust the CMS you
can grow with

Benefits

TYPO3 is the furthestmost used enterprise content management system - not without a reason! TYPO3 enables you to create, publish and syndicate any type of content to multiple devices and channels ...

Reliable and Trustworthy

One thing in life you cannot speed up is gaining experience - TYPO3 represents more than 15 years of professional know-how, including reliable and structured prospects for the future.

Easy

Sure you'll need a little training, but once you've been introduced to your new CMS it's as easy as ABC – promise!

Expandable and Flexible

It doesn't stop if you don't want it to. Your development agency can, for example, extend the functionality of your TYPO3 to seamlessly connect it to your desired system.

Open Source and Free

The huge TYPO3 community provides help, feedback, services, support and development and there are no licence costs involved.

Secure

TYPO3 has a dedicated team for permanent monitoring. This provides very short reaction time in case of reported vulnerability issues.

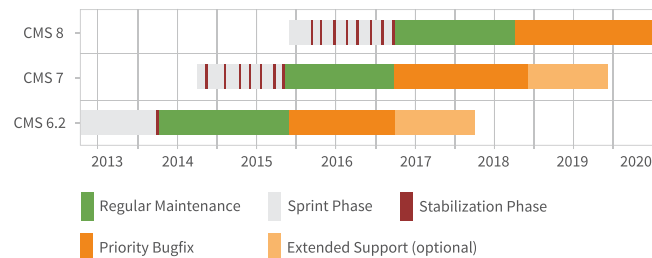

Performance Based

Due to its outstanding system architecture, TYPO3 succeeds in processing the most complex systems and fulfilling any requirements.

Predictive. One of the greatest assets for the future.

We adhere the exact date of releases and updates!

Whereby the latest version is constantly improved, the older versions are safed. TYPO3 grants you the most effective approach to plan your projects not only in the short but also in the long run. Dates of releases and updates are scheduled a long time in advance. Additionally, they are kept up to date and communicated in a transparent way.

Long Term Support (LTS).

Thanks to the TYPO3 Long Term Support (LTS), you don't have to worry about mentoring anymore. Until March 2020, your TYPO3 support is granted.

LTS is always the last sub-version before a new version of TYPO3 is published. While you already work with the fully elaborated version TYPO3 7 LTS, you may also have a peek through the keyhole to the future as TYPO3 8 can reveal where the road is heading. To get even more planning security, you can purchase the additional Extended Long Term Support (ELTS). ELTS enjoys the advantage of one extra year support extension.

Combined, you have the perfect mix of a stable and well supported version and a prospect to the future.

Times are Changing. CMS is as well.

The importance of “new” channels has steadily grown. Therefore, your requirements and also your opportunities have changed. For handling this issue, TYPO3 is the best solution for you!

“Just running a website” isn't enough anymore. Enterprise users, for example, want to spread content as well as collect data and assets out of the ERP or eCommerce system for joining them together in a nicely rendered PDF on their corporate website.

TYPO3 not only drives traditional websites, but also apps - no matter if they are native or web-based responsive ones. Also, a broad range of social media channels and direct marketing with mails and even print support can be processed. TYPO3 supports all of these, either out-of-the box or with free extensions.
